Federal Regulatory Cost Burden: A Multi-institutional Study Overview and Findings

Completed by and with the Boston Consulting Group

October 2015
Two-Phase Approach for Multi-institutional Study

**Phase I**
- Categorize the federal regulations that significantly impact Vanderbilt
- Estimate the annual cost burden borne by Vanderbilt to comply with these regulations

**Phase II**
- Identify participating institutions
- Collect data across all relevant regulatory areas at each institution
- Estimate federal compliance burden for each institution

**Key Deliverables**
- Summary of findings with costs by regulatory area
- Detailed results guide with backup data and model for all areas

**Summary of findings**
- Preliminary sector extrapolation
Methodology Anchored on Defining Scope, Employing Tools and Methods and Following Principles

**Scope**

1. **Categories of regulatory areas**
   - Research
   - Higher education
   - All-Sector

2. **Types of costs**
   - Labor
   - Nonlabor
   - Indirect costs of labor

**Tools and Methods**

1. **Decentralized Costs:** incurred from academic depts. and research centers
   - Survey instrument with detailed compliance activities and examples
   - Select interviews/worksheets

2. **Centralized Costs:** incurred from central/admin offices
   - Interviews with key contacts and worksheets

**Principles**

- Principles to determine if an activity is required to comply with federal regulation
## Scope of Regulatory Areas Assessed

</table>
Types of Costs Considered

• **Labor costs**: including activities such as reporting (including data gathering), giving and receiving training, institutional policy development and review, oversight and management (including answering questions from employees, students, parents, etc.), time spent interpreting regulations, preparing and implementing operational changes, responding to potential issues of noncompliance, interacting with regulators and auditors, and any day-to-day activities resulting from the practical impact of regulations.

• **Nonlabor operating costs**: including any outsourcing of the above activities to external vendors; external trainings and conferences (including travel costs); materials, supplies, and services to support the above activities (e.g., equipment, facilities); software licensing fees; and fees associated with permits, licenses, applications, and registrations. Note that taxes, penalties, and benefits paid were not included in cost estimates (e.g., FICA, ACA, ERISA).

• **Indirect costs of labor** were estimated based on labor costs: the ratio of specific categories of indirect costs to total institutional labor was determined and applied to the estimate of compliance-related labor costs. Specific categories of indirect costs included utilities, operating leases, minor equipment (e.g., computers), insurance, professional development, recruitment, travel, telephone, office supplies, computer software, printing, postage, freight and shipping, courier service, direct mail, memberships, and subscriptions.
# Tools and Methods

<table>
<thead>
<tr>
<th>Cost type</th>
<th>Tool / Method</th>
<th>Description</th>
</tr>
</thead>
</table>
| Decentralized Costs: incurred from academic depts. and research centers | Surveys | • Estimated time spent by faculty and admin staff in academic departments and research centers on compliance through survey  
  – Survey contained detailed description of specific activities and examples as relevant |
|           | Worksheets / Interviews | • Gathered decentralized time costs in several areas where information collected centrally |
|           | Data                | • Leveraged budget and payroll data to inform estimates                     |
| Centralized Costs: incurred from central / admin offices | Worksheets / Interviews | • Provided detailed worksheets to leadership of various administrative offices with example activities and instructions to complete  
  • Employed iterative process to resolve questions and to ensure methodology consistency |
|           | Data                | • Leveraged budget and payroll data to inform estimates                     |
Principles to Determine if an Activity is Required to Comply with Federal Regulation

The following principles were used as guidelines to determine if an activity is required to comply with federal regulation:

- The institution would have been ineligible for a U.S. federal program if it had not performed the activity;

- The institution would have stopped receiving a U.S. federal benefit if it had not performed the activity;

- The institution would have risked violation or penalties under U.S. federal law if it had not performed the activity; or

- The institution performed the activity to determine whether any of the above items applied.
Summary of Findings

Across all 13 institutions, federal regulatory compliance burden ranges between 3% and 11% of annual operating expenditures, with a median value of 6.4%

- In research related areas, significant drivers on the cost of compliance include mix of research being conducted (e.g., medical school-based research vs. humanities) and overall scale in the research enterprise
  - Grants and contracts is the largest area, followed by human subjects and environmental health and safety
- In nonresearch related areas, smaller institutions generally having a higher unit cost, with accreditation being the largest cost area

Time spent on federal compliance ranged on average from 4% to 15% with research staff, research faculty and admin staff in academic departments having higher values

Sector extrapolation results in a sector-wide estimate on the cost of federal regulatory compliance of ~$27B

- Methodology based on an institutional segmentation and on various scale tiers on research and nonresearch
- Higher education and all sector compliance ~60% of total burden, research compliance ~40%
Estimate the Cost of Federal Regulatory Compliance at 13 Diverse Institutions

Source: IPEDS 2013-2014
Overall Federal Regulatory Compliance Costs Across Institutions ~3%-11%

# of institutions (N=13)

Cost of compliance as % of FY2014 operating expenses

Source: Cost of Federal Regulatory Compliance Study
Research Compliance: Grants and Contracts Largest Area

Estimated compliance cost (% of research expenditures)

- Grants & contracts: 8.3%
- Human subjects: 2.0%
- EH&S (research): 1.6%
- Research misconduct: 0.3%
- Conflict of interest: 0.3%
- Export compliance: 0.1%
- Tech transfer: 0.1%

Source: Cost of Federal Regulatory Compliance Study
Grants and Contracts Compliance Driven by Pre-Award Management, Post-Award Activities

Estimated compliance cost (% of research expenditures)

- Pre-award management: 2.6
- Effort reporting: 0.6
- Post-award accounting: 2.3
- Sub-recipient monitoring: 0.7
- Post-award management: 2.1
- Other: 0.4
- Total grants & contracts: 8.3

1. Includes unclassified activities such as training and oversight.

Note: Total of 8.3 represents the total grants and contracts median of the 8 research institutions, not the sum of individual medians of sub-categories (e.g., pre-award management, effort reporting, post-award accounting, sub-recipient monitoring and post-award management).

Accreditation Burden Varies with Number of Programmatic Accreditors, Scale, and Regional Accrediting Body

Estimated accreditation compliance cost (% of nonresearch expenditures)

Note: Includes both regional and programmatic accreditation compliance costs
Source: Cost of Federal Regulatory Compliance Study
Sectorwide Estimate Developed Based on Bottom-up Methodology

1. Research segments defined based on research expenses, as follows: Low research $1-50M, Medium research $50-150M, High research >$150M
Sectorwide Federal Regulatory Compliance Cost Estimated at ~$27B

Estimated federal regulatory compliance cost ($B)

- Research – Nonmedical School: $6B
- Research - Medical School: $5B
- Higher-Ed and all-sector: $10B
- Community Colleges: $6B
- For-profits: $1B
- Total Estimated Compliance Cost: $27B

Relevant expenditures
- Research – Nonmedical School: $41B
- Research - Medical School: $22B
- Higher-Ed and all-sector: $294B
- Community Colleges: $64B
- For-profits: $15B
- Total Estimated Compliance Cost: $435B

Compliance % based on sample institutions
- Research – Nonmedical School: 14%
- Research - Medical School: 20%
- Higher-Ed and all-sector: 3%
- Community Colleges: 9%
- For-profits: 6%
- Total Compliance Cost: 6%

1. Based on NSF 2012 HERD survey results
2. Based on 2013 - 2014 IPEDS and publicly available financial statements
3. Based on federal regulatory compliance costs from Phase I and Phase II institutions, adjusted as % of relevant expenditures reported by NSF and IPEDS in (1) and (2) above
Estimated Sectorwide Cost of Compliance per Regulatory Area Based on Extrapolation from Sample Data

Estimated cost of sectorwide compliance ($B)

- Grants & contracts: 6
- Regional accreditation: 3
- Programmatic accreditation: 3
- Financial aid: 2
- Human subjects compliance: 2
- Disability: 2
- EH&S (research): 1
- Immigration: 1
- All Other: 7
- Total: 27

Higher Ed "All-sector" Research

- Higher Ed: $11.1B
- "All-sector": $5.6B
- Research: $10.2B

Note: Estimation by regulatory area based on average (i.e., not medians) compliance burdens across participating institutions. Source: Cost of Federal Regulatory Compliance Study; NSF Herd survey data; IPEDS; BCG analysis.
